Experience

Lyearn, Product Manager

Jan 2026 – Present

- Shipped **AI Avatar Video** in Lyearn's course builder, a new LMS learning modality. Evaluated 7 platforms (HeyGen, Synthesia, Panopto, Colossyan, Hedra, fal.ai, Descript); selected HeyGen, negotiated a capped **pay-per-use commercial**, and integrated the **API end-to-end** (credit logic, post-generation editing).
- Selected for the **ElevenLabs startup grant** for Lyearn by leading the application end to end: **\$4,000+** in value supporting **680+ hours** of voice agent runtime across a **12-month runway**; now powering the voice layer across **AI Coach**, and **Roleplay**, with custom voice agents and multilingual narration in active integration.
- Leading the build-out of **Lyearn's Project Management tool** (Productivity Intelligence Platform): defining core domain entities, productivity roles, and role-to-MGSA mappings (mindsets, goals, skills, activities); authoring mockups that surface role-level productivity insights for project teams.
- Owned **AI Roleplay end to end**: scoped the product, designed mockups, authored the PRD, drove engineering, and shipped the **voice and multilingual layer** with persona-specific profiles. In production for enterprise sales teams practicing dynamic deal scenarios against **AI personas**.
- Documented and scoped **functional specs** for existing platform features into release-ready briefs (source of truth across engineering, sales, and customer success). Owned a **top seat client partnership**: shipped the workspace enhancement roadmap and secured renewal by reconstructing a 76-feature delivery history across 6 financial years.

Amadeus Software Labs

Associate Product Manager

Nov 2024 – Apr 2025

- Launched Air Canada **Carbon Offset** via CHOOOSE and IATA CO₂ Connect integration: **4%** adoption rate, **1.5%** booking revenue uplift.
- Shipped **CFAR** (Cancel For Any Reason) add-on with an automated claims API in the booking flow: **3%** conversion lift, **8%** reduction in cart abandonment.
- Deployed the **CXL Car & Hotel Widget** for bundled ancillary add-ons: **10%** cross-sell uptake, **20%** increase in average booking session duration.

Software Development Engineer

Jul 2023 – Nov 2024

- Eliminated **horizontal privilege escalation** risk across user-data endpoints by shipping **server-side RBAC** with security review.
- Resolved booking flow price-breakdown discrepancies via **dynamic passenger-type** fare recalculation with DOB validation.

Skills

Discovery & Research: User interviews, surveys, competitor & market analysis, persona development, JTBD canvas, problem framing

Strategy & Prioritization: RICE prioritization, MVP scoping, North Star & guardrail metric design, risk identification, roadmap planning

Execution: PRD authoring, functional spec writing, mockup & wireframe design, vendor evaluation, commercial negotiation, API integration, domain modeling, cross-functional delivery

AI/LLM: Prompt engineering, LLM pipelines (segmentation, TTS, image generation), voice agents (ElevenLabs), AI persona design, recommendation & scoring engines

Stack & Tools: Python, SQL, REST APIs, Figma, Postman, Jira, Notion, n8n, Mixpanel, Google Analytics

NextLeap Fellowship

- Led 0-to-1 MVP strategy development for **Ascend**, conducting 25+ user interviews to uncover that 67% of early career professionals face choice paralysis when selecting skills to develop, directly informing feature prioritization.
- Executed a 9 week product cycle on Zepto's scheduled deliveries feature, covering market analysis, user research, problem framing, ideation, wireframing, and PRD delivery.
- Product teardowns of **CRED** (rewards strategy and peer-to-peer payment flows for its high-value, credit-conscious user base) and **Zomato** (notification systems, user segmentation, monetization model) surfacing growth opportunities and actionable UX/engagement insights for each.

Education

B.E. CSE, Thapar Institute of Engineering and Technology

Aug 2019 – Jun 2023 | Patiala, India
