Engineer turned PM who builds AI products. Every link on this page runs.

Experience

Lyearn, *Product Manager* Jan 2026 – Jun 2026

- Shipped **AI Avatar Video** in Lyearn's course builder, a new learning format. Evaluated 7 platforms (HeyGen, Synthesia, Panopto, Colossyan, Hedra, fal.ai, Descript), selected HeyGen, negotiated a capped **pay-per-use commercial**, and integrated the **API end to end**.
- Won the **ElevenLabs startup grant** for Lyearn by leading the application end to end: **$4,000+** in value and **680+ hours** of voice runtime over a **12-month runway**, powering the voice layer across **AI Coach** and **Roleplay**.
- Owned **AI Roleplay end to end**: scoped the product, designed mockups, wrote the PRD, drove engineering, and shipped the **voice and multilingual layer** with persona-specific profiles. In production with enterprise sales teams practising deal scenarios against AI personas.
- Secured the renewal of a **top-seat client** by reconstructing a **76-feature delivery history across 6 financial years** that was recorded nowhere, and shipped their workspace enhancement roadmap.
- Turned shipped features into **functional specs**, the source of truth for engineering, sales and customer success.

Amadeus Software Labs Jul 2023 – Apr 2025

Associate Product Manager Nov 2024 – Apr 2025

- Launched **Air Canada Carbon Offset** via CHOOOSE and IATA CO_2 Connect integration: **4%** adoption, **1.5%** booking revenue uplift.
- Shipped the **Cancel For Any Reason** add-on with an automated claims API in the booking flow: **3%** conversion lift, **8%** reduction in cart abandonment.
- Deployed the **CXL Car & Hotel Widget** for bundled add-ons: **10%** cross-sell uptake, **20%** longer average booking session.

Software Development Engineer Jul 2023 – Nov 2024

- Eliminated **horizontal privilege escalation** risk across user-data endpoints by shipping **server-side RBAC** through security review.
- Resolved booking-flow price-breakdown errors with **dynamic passenger-type** fare recalculation and date-of-birth validation.

Built and Shipped

Think Peepal · think-peepal.vercel.app Jul 2026 – Present

- Own product and design for a focus app where a tree grows while you focus: mapped **12 user journeys**, designed an **anonymous-first onboarding** (a two-minute first session, no sign-up) and specced all **35 screens** across **11 user flows**.
- Designed the core loop and its feel: trees that **grow through 5 stages** (14 species, 5 regions), an **orchard** whose sky follows your clock, **3 stakes modes**, **motion studies**, and a contrast-audited **design system** in two themes.

Prod AI, *Solo build* · prod-ai-studio.vercel.app Sep 2026

- Describe an app in plain words, see it sketched, then get a governed **agentic app**: anything irreversible **asks a person first**, and prices come from code, never the model. Built solo in **3 days** with a full **production architecture**.

iLumos, *Solo build* · ilumos-v3.vercel.app Sep 2026

- Refines a patent claim chart where the four checks carrying legal exposure are **plain code the model cannot override**. Red-teamed it over two rounds and fixed **ten defects**, including a path that let forged provenance through.

Trial Shift, *Solo build* · trial-shift.vercel.app Jul 2026

- An AI accounts payable agent that works **16 real invoices** and reports back. A model only reads; every clear, escalate and refuse is **deterministic code** carrying its rule, and changed bank details are never delegated.

Shram · shram-ai.netlify.app Jun 2026

- A teardown of an on-device Mac memory layer, rebuilt into a landing page after a week of use. The founder shared insights.

NextLeap Fellowship May 2025 – Aug 2025

- Built and shipped **Ascend**, a live 0-to-1 MVP: surveyed the cohort (**61%** named choice overload), prioritised with RICE, and shipped in four days an LLM that ranks 64 curated courses, with a deterministic scorer as backup. Also ran a 9-week product cycle on Zepto scheduled deliveries and teardowns of **CRED** and **Zomato**.

Skills

Product: user interviews, surveys, market analysis, JTBD, RICE, MVP scoping, North Star and guardrail metrics, PRDs and specs, vendor evaluation, commercial negotiation

AI / LLM: LLM pipelines, voice (ElevenLabs), deterministic guardrails, evaluation and red-teaming, retrieval with citations

Stack & Tools: Python, SQL, REST APIs, Claude Code, Cursor, Figma, Jira, Notion, n8n, Mixpanel, Google Analytics

Education

B.E. CSE, *Thapar Institute of Engineering and Technology* Aug 2019 – Jun 2023 | Patiala, India
